

## Affording Optune®

When your nCompass Care Coordinator calls, part of the discussion will help answer your questions about affording Optune and identify resources to minimize your cost. This cost is different for each person and is based on income, insurance, and other factors.

**Step 1:** Your Care Coordinator will ask you for your Adjusted Gross Income (AGI) over the phone and will use this information to estimate your cost.

**Step 2:** Following the call, you will be asked to complete a brief form and confirm this income information.

**Step 3:** Once this form is sent to Novocure®, you will receive a letter confirming your cost of Optune.

An nCompass Case Manager will be working with your insurance on your behalf. During this process, your assistance may be needed. If so, we will contact you.

In most cases, people are able to start Optune while their Case Manager works to receive an approval from the insurance company. Your Care Coordinator will explain the process for your specific situation.
